TRANSPLANTED FLASKS OR COMMUNITIIY-POT-LOTS OF "BARE ROOT" SEEDLINGS

PAGE 2

- #48-C LAELIA ANCEPS ALBA X SELF - Now that Laelias are zooming in popularity, demands for the pure White Anceps are greater than ever, and it always was a scarce item. This one was Pure White, and if it breeds true, should fill the bill. Not a proven parent, so we can only hope for the best.
- #130-S C. BOB BETTS X C. BOWBELLS - Bowbells and offspring, Bob Betts, are already so well known for their prize-winning qualities, this cross needs little, if any, ballyhoo, except to say that both were top quality, round, heavy Whites and no doubt would have been awarded if entered in any show.
- #794 BLC GOLDEN MYTH VAR BUTTERCUP X C. EDITHAE #1 - Richest of solid yellow Bles, crossed with big, white Edithae. A cross of this Golden Myth with another white is already producing fine, clear YELLOWS. I expect the same result from this.
- #795 B. GLAUCA X BLC GOLDEN MYTH VAR BUTTERCUP - Tailored green-white "brasso" carried this pod, and the anticipated result: Fine, small bright YELLOWS similar to Be Daffodil, except larger.
- #812 C. BOWBELLS (Edithae #1 X Suzanne Hye var. Snow) - Fine, highly productive Edithae, with pure white Suzanne Hye, should turn out flowers that live up to the BOWBELLS reputation.
- #820 B. DIGBYANA X SELF - This famous "Mother of Brassos" has become such a scarce species that we decided to grow some from seedlings. They are of the spindly form typical of this species but sturdy enough to grow well, once they are established in community pots.
- #827 LC LUCIFER X LC MOONBEAM X C. DOWIANA AUREA - Both parents were fine, clear yellow with brilliant red-purple lips. Expect good Summer yellows.
- #829 C. BARBARA BILLINGSLEY X C. BEVERLY BOSWELL - Extra vigorous White cross for free-flowering White blooms for Winter holiday season.

Any individual flask above (your choice) 100 or more seedlings per flask....\$15.00
Community-Pot-Lot - 25 seedlings of any individual cross above..... 6.00

- #798 C. PERCIVALIANA, GRANDIFLORA X POTINARA ETHEL WARD - A brilliant flower, larger than the average "percy", carried the pod, lending its strong species vigor to the more temperamental Potinara hybrid. This dark, heavy Ethel Ward, with deep red lip, should foster some unusual progeny.

One 250cc flask (100 or more seedlings) of this #798.....\$20.00
(Limit, one flask of this cross per customer.)
Community-Pot-Lot (25 seedlings of #798)..... 7.50

- #821 POTINARA ANISE X BLC BARBARA WILCOX - Such fine REDS as Slc Canzac have proved the advantages of crossing strong yellows with Slc's or Potinaras for more and REDder REDS! Expect the same to be proven by this cross.

One 250cc flask (100 or more seedlings of #821).....\$25.00
(Limit, one flask of this cross per customer.)
Community-Pot-Lot (25 seedlings of #821)..... 10.00

NOTE: ALL SEEDLINGS OFFERED ABOVE WILL BE REMOVED FROM FLASKS, WASHED FREE OF AGAR, AND FLOWN TO YOU, AIR MAIL, POTTING MIX AND FUNGICIDE INCLUDED.

DANIEL RYERSON, BOX 805, HOMESTEAD, FLA.

DATE _____

Fly the following flasks ☐ or, Community-Pot-Lots ☐ of Bare Root seedlings to me, including potting mix, fungicide and planting instructions _____

Enclosed is my check or money order, payment in full for this order.
